

Put the **Power of 3** to work for you.

**Performance. Quality. Price.**

**Performance** on tough weeds, **quality** you can count on, and **priced** to be a great value.

"RT 3™ works great. It does a good job for me so I don't use anything else. I am 100 percent no-till so I use a lot of it for control of my wheat stubble."

**Gerald Boyer**, Newkirk, Oklahoma

"I like the RT 3 herbicide because of its more concentrated formulation, which means less product handling, less time pumping it into the tank and running back and forth to the dealer. This will save us a lot of time."

**Scott Easterly**, Sydney, Nebraska

"RT 3 seemed to be more adaptable to different conditions. It killed the target weeds with more consistency."

**Mark Hall**, Colfax, Washington

"I think the sales and technical support is the difference that keeps me using Roundup® products, like RT 3. In case of rain or a dust storm, my rep takes care of me and keeps me coming back. RT 3 seems to work faster than anything else we had before."

**Lee Blachly**, Pomeroy, Washington

"I've been working with and selling Roundup brand agricultural herbicides for 30 years now, and this new RT 3 herbicide is the most promising I've seen yet. It is a very consistent performer, and it is affordable and convenient to use."

**Jim Briden**, Chester, Montana

RT 3 herbicide is specially formulated to outperform competing herbicides on tough weeds in tough conditions. Plus, it's rainfast in just one hour and backed by Monsanto sales and technical support.

Roundup® Technology includes Monsanto's glyphosate-based herbicide technologies.

**Always Read and Follow Pesticide Label Directions.** Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® agricultural herbicides. Roundup® agricultural herbicides will kill crops that are not tolerant to glyphosate.
