

# 9 billion

people to feed. A changing climate.

# NOW WHAT?

Experts say we'll need to double agricultural output by 2050 to feed a growing world. That's challenge enough. But with a changing climate, the challenge becomes even greater.

Providing abundant and accessible food means putting the latest science-based tools in farmers' hands, including advanced hybrid and biotech seeds. Monsanto's

advanced seeds not only significantly increase crop yields, they use fewer key resources – like land and fuel – to do it. That's a win-win for people, and the earth itself.

Producing more. Conserving more. Improving farmers' lives. That's sustainable agriculture. And that's what Monsanto is all about.

**The world's farmers will need to double food production by 2050. Biotechnology can help.**
